

HANFORD

CLEANUP

Request for Public Comment on:

300-FF-1 and 300-FF-5 OPERABLE UNITS PROPOSED CLEANUP PLAN

The Tri-Party Agencies are recommending preferred cleanup alternatives for the 300-FF-1 and the 300-FF-5 Operable Units located in the 300 Area of the Hanford site. The preferred alternative for 300-FF-1 calls for excavation and disposal of contaminated soil and materials in Hanford's Environmental Restoration Disposal Facility. The preferred alternative for 300-FF-5, which focuses on the groundwater and river water near the 300 Area, is to allow the contaminants to diminish naturally over time. Groundwater monitoring will verify the reduction of contamination and institutional controls will continue until cleanup standards are met in approximately 3 to 10 years.

300 AREA PROCESS TRENCHES MODIFIED CLOSURE PLAN

The preferred alternative for cleanup of the 300 Area Process Trenches calls for excavation and disposal of soil until industrial standards are met. Cleanup work will be completed in conjunction with the plan approved for the 300-FF-1. Comments are also requested on associated permit conditions which will be incorporated into the Hanford Facility Wide Resource Conservation and Recovery Act permit.

A public meeting is not planned, however, a meeting may be requested. To provide adequate notice to all Hanford stakeholders, public meeting requests should be submitted by December 19, 1995 to either person listed below.
